

- Personal Professional Profile -

Hi, I'm Jam Lam. As a graduate in Multimedia Design at The One Academy, I discovered my passion in interactive and technologies. Apart from my fulltime commitment, I actively involved in hackers and makers community where we explore new technology ideas in the realm of Art & Design.

Beside my technical strenghts, I also acknowledge the importance of User Experience (UX) design. I always ensure the application of UX thinking in my working process in order to meet the users' expectation in the best possible ways.

- Technical Skill -

HTML5	AS3
CSS3	Xcode
Java Script	Corona Lab
Jquery	Arduino
PHP	Illustration
MySQL	UIX

- Experience -

2012.8

Lecturer in Interactive Design and New Media.

The One Academy of Communication Design

As a mentor, I am responsible to brainstorm with students and provide guidance in their ideation process. Apart from this, I also conduct programming workshops, for example JavaScript, Flash AS3.0, HTML 5, Arduino programming and mobile app programming.

On the side, I am also a member of in house R&D team for new media design.

2012.5

New Media Design Interns

Next Digital Agency

3-month internship as New Media Designer at Next Digital, a established new media agency. During my service, I had involved in several significant projects for instance Flash game for VICO Malaysia and video editing for Pronton Malaysia.

Professional Personal Profile •

- Experience -

2012.8

Part-time Graphic Designer

i.Star Ideas Factory Sdn. Bhd

During my college time, I managed to work as a part-time Graphic Designer at i.Star Ideas Factory. I was responsible to design magazine layouts and newspaper advertisements. Being able to involve in commission works as a student, has enhanced my skills and broaden my knowledge in Art & Design.

2014. 6

Design Lead & Event Organizer

AngelHack Kuala Lumpur 2014

AngelHack is a nationwide and the biggest hacker event in Malaysia. As the Design Lead and one of the organizers, I managed to lead the team in making the event a big success. The event has successfully attracted 250 participants from all around Malaysia and managed to produce 50 creative projects in the duration of 24 hours. It was featured as the "Hackathon of the Year" for the year of 2014.

I also played the role as one of the mentors to brainstorm and guide the hackers towards creativity and insightful ideas during the hackathon.
